

CHRISTIAN MORAES

Software & AI Engineer

Experience

Software & AI Engineer

AgentBooster

Dubai - Remote

- Process automation with n8n and Python; full-stack development and databases
- Machine Learning models with TensorFlow and Python
- LLM agents with Python and LangChain, prompt engineering, and function calling
- RAG with embeddings and vector databases in PostgreSQL using pgvector and RLS
- Integrations with APIs/webhooks/MCP and CRMs (Salesforce, HubSpot, Zoho)
- Deployment/hosting of microapps, components with JavaScript, and Docker
- Analysis of GPT, Claude, Gemini, and Grok models; and AI audiovisual content generation
- Automation and Gen-AI Consultant

March 2025 - April 2026

Full-Stack Developer

Risolvía

Spain - Remote

- Front-end, back-end, and AI agent development for legaltech
- RAG, embeddings, and vector database (pgvector in PostgreSQL/Supabase)
- GDPR (consent), reCAPTCHA v3/CSS, and hardening
- Research and compliance with Uruguayan and Spanish law

July 2025 - January 2026

Growth Marketing & Automation Developer

MyEcomProject LLC

Santiago, Chile

- Sales, call/in-person closing, objection handling, and consumer psychology
- Design and management of advertising campaigns for diverse clients across Meta, Google, and TikTok (budgets, segmentation, A/B testing)
- Tracking and tagging (UTM, conversion events) with reporting and KPIs
- Sales funnel direction and web integrations (landing pages, offers, storytelling)
- Design of acquisition and nurturing workflows (email, CRM, lead flows)
- Creation and direction of organic and paid media content

April 2024 - October 2025

AI Engineering
ML & Deep Learning
Full-Stack Development
Business Intelligence
Cloud Computing
Algorithm Optimization

Profile

Passionate about the intersection of code, hardware, artificial intelligence, and business efficiency. I specialize in full-stack development, machine learning, and systemic automation, building scalable solutions to solve real-world problems. I am defined by high professional standards and critical thinking. I value hands-on experience and the principles of each organization.

Projects

- **Neural Time Series Forecaster GRU/LSTM**
(for UCU - Py, TS, TF)
- **KineticGuard ACWR** (iOS/Swift)
- **C-PhysEngine 2D** (C/C++)
- **Vision Image Classifier CNN**
(for CS231n - Py, TF)

[View more](#)

Education

- **Machine Learning Spec. (Stanford Online)**
- **Adv. ML on Google Cloud (Google Cloud)**
- **Full-Stack Dev. Prof. Cert. (Microsoft)**
- **IA Heroes Pro (Learning Heroes)**
- **Data Science Prof. Cert. (IBM)**
- **CS50x (Harvard)**
